

My Data Life Cycle

Austin Mercado

2023-02-23

1. Plan: To create a gameplan/web out a goal toward an idea.
2. Collection: Collect Data that either support or do not support the goal.
3. Processing: Comense further tests and estimations of those datas.
4. Visual: Create visualations to further and easily spread mainstream across to others.
5. Storing: Saving the collection/processed data/visuals for safe keeping.
6. Sharing: Release one's finding others
7. Analysing: Supporting peers determine whether one's finding is approvalabe/acceptable/reasonable.
